

PROJECT PROFILE

Hook Lane Junior School, Welling Kent

Solution: Eclipse66 Quad

Type: Supply and Install

Location: Welling, Kent

Creating UV protection for outdoor classrooms and children's play areas

UV Protection for outdoor classrooms and play

Project Brief

Hook Lane Primary School wished to create a significant area of shading within their playing field. This was to be a versatile structure to provide UV protection for use as an outdoor classroom, shelter for sports and children's play, school fetes, etc.

Solution

Fabric Ten supplied and installed our Eclipse66 Quad, a an array of 4No. 6m x 6m Hyperbolic Square sail shades linked to form the array. The sail shade was orientated to maximise shade and compliment the space. The knitted HDPE Fabric provides over 90% UV protection to this area as well as striking contemporary colours.
