

EQUINOX SHADE PROTECTION

Design Profile

Design Features

Our simplest form of sail design. Modules are often linked together or combined with other module designs. Multiple sails can create visually dramatic repeated forms and also provide the opportunity to apply a variety of colour.

Applications

- Visual focal points
- Shaded outdoor classrooms
- Restaurants / bars
- Building entrances

Standard Sizes

| | L | W | H1 | H2 |
|----------|----|----|------|------|
| Equinox5 | 5m | 5m | 3.7m | 2.5m |
| Equinox6 | 6m | 6m | 3.7m | 2.5m |
| Equinox7 | 7m | 7m | 3.7m | 2.5m |

- Alternative sizes and multiple modules are available.

Shade Canopy

- Harmful UVA and UVB rays are blocked by up to 98%.
- Up to 30% light transmission
- Breathable allowing air circulation for a cooling effect.
- UV stabilised HDPE 340gms/m² and "Heat Set" for extra stability.
- 10 year UV warranty.
- Available in an extensive range of natural and contemporary colours.

Support Poles and Fixings

- Support poles are supplied in mild steel with a galvanised finish as standard. A polyester powder coated finish in standard RAL colours is also available.
- Fixings are zinc plated mild steel or marine grade 316 stainless steel.
