

SPECTRUM SHADE PROTECTION

Design Profile

Design Features

This sail array comprises a series of linked and overlapping hyperbolic sails providing a significant area of shade protection. The configuration can be adjusted to suit site specific requirements.

This linked module provides a cost effective shade solution for larger areas of shade protection.

Applications

- Play areas / Parks
- Shaded outdoor classrooms
- Visual focal points

Sizes

Custom sizes to suit individual sites

Shade Canopy

- Harmful UVA and UVB rays are blocked by up to 98%.
- Up to 30% light transmission
- Breathable allowing air circulation for a cooling effect.
- UV stabilised HDPE 340gms/m² and "Heat Set" for extra stability.
- 10 year UV warranty.
- Available in an extensive range of natural and contemporary colours.

Support Poles and Fixings

- Support poles are supplied in mild steel with a galvanised finish as standard. A polyester powder coated finish in standard RAL colours is also available.
- Fixings are zinc plated mild steel or marine grade 316 stainless steel.
